CRONSHAW FACILITIES MANAGEMENT LTD

Electrical Design, Installation & Vehicle Charging Specialists

www.cronshawfacilities.com

ABOUT US...

Cronshaw Facilities Management Ltd is a family run electrical contractors, successfully operating for over 8 years with founder and owner Wayne Cronshaw.

Through their team of highly trained technicians they have over 18 years' experience in the electrical, contracting & consultancy industry. Wayne operates CFM from their base in Garstang, and is now providing electrical design and installations to customers, not only across the North West, but throughout the United Kingdom, offering a competitive tendering rate. CFM works on all aspects of commercial and domestic electrical installations.

Always keen to develop the business, Wayne and CFM have undergone extensive training to reach new qualifications within the motoring industry and is now registered with 'The Office of Low Emissions Vehicles' and registered as an 'Approved Installer' by three major manufacturers of charging points – Andersen, Rolec and Tesla.

CFM will work with you, helping to assess which charging point suits your property and vehicle.

Please contact us for a FREE quotation and grant funding application options.

GRANTS...

ELECTRIC VEHICLE HOMECHARGE SCHEME (EVHS)

The Electric Vehicle Home Charge Scheme (EVHS) provides up to £350 off the cost of purchasing & installing a home charging point. You can claim one charge point per eligible vehicle and up to two eligible vehicles per household.

WORKPLACE CHARGING SCHEME (WCS)

The OLEV (Office for Low Emissions Vehicles) Workplace Charging Scheme (WCS) allows businesses and organisations across the UK to benefit from grant funding towards the purchase and installation of EV charging points.

A total of £350 per socket is available, with businesses and organisations able to adopt up to a maximum of 40 sockets. Businesses and organisations are therefore entitled to up to £14,000 of OLEV grant funding for their workplace.

ANDERSEN...

A stylish EV charging point that hides the integrated cable. The Andersen A2 enhances the charging experience for the enthusiast electric vehicle drivers with 22kW power and SMART controlled connectivity. Unrivalled aesthetics and pioneering technology are showcased perfectly in the Andersen A2 to work with your smart phone.

There is a perfect Andersen for every home. Choose yours from 8 carefully selected metal shades that are expertly hand-sprayed for ultimate durability and a beautiful even colour. There is an option of 4 translucent wood front shades that allow the grain of the wood to shine through.

ROLEC EV...

Rolec EV specialise in the design and manufacture of a comprehensive range of electric (EV) charging solutions - offering quality products at competitive prices.

From the entry level, low cost Wall Pod: EV Ready unit, through to the sophisticated EV Control Centre, Rolec EV has a full range to suit every budget - domestic and commercial.

TESLA...

CFM are approved Tesla installers and have been trained to install Tesla charging equipment and adhere to strict quality, permitting and inspection requirements. For quality control and service purposes, we provide Tesla with information regarding you and the installation once it has been completed.
